

manufacturing solutions

Juno works closely with its customers to produce products with aggressive cost targets. This is most effective in collaborative working relationships.

results include . . .

- Proposed and implemented automated assembly to eliminate quality and delivery problems at another supplier at significant piece part savings.
- At understood cost targets (piece part price and tooling), implemented a manufacturing solution achieving the goals.
- After developing the molded parts (prototyping and production), offered and won a bid to assemble the product complete versus other customer proposals.
- Developed the concept of reducing a four-part assembly to a single part complete off the molding machine.
- And more . . .
